DOOR
CATALOGUE 2017

ABOUT US

We offer modern designer COMPOSITE STEEL DOORS, classic constructions as well as anti-burglary entry doors for homes, apartments and public use buildings. The brands we offer have a distinct style and technical applications so that the process of choosing is simple. We attach great importance to product quality, while still keeping in mind the budget of our customers. Warm, safe, and modern, made from high-quality materials resulting in a product which is durable and secure. When deciding on such a door, there is the possibility to adjust the model, the thickness of the leaf, frame type, door handles, custom made side and top panels, as well as many other options.

Advantages:

- thickness from 54 mm – 86 mm
- u-value as low as 0,85
- multi-locking system
- triple glazed with safety glass
- insulated with PU Foam
- wide range of colours
- height up to 240 cm and top panels if required

After researching the door market in Ireland for a number of weeks and finding a limited selection of either low quality PVC doors or very expensive doors. I decided to contact Mac at SM Solutions. My first impressions were enough for me to make my choice and it was just a matter of finding the right style to match the house. I made a booking for measurements to be taken and Mac arrived on time with samples and pictures to help with my decision. Every question asked and every query was met with an honest and clear answer with no groaning or guess work. The door arrived on time and was installed with meticulous attention to detail even down to matching the old surrounding framework with the and blending in some sand with the sealant to make it look more authentic. It was just a genuine heart and soul effort from start to finish and I think that it is getting rare to find such good quality workmanship nowadays. So best of luck to you and your partner Mac – I really and truly thank you for your time and patience and your professional approach from start to finish. Good luck in everything you do

Graham

I had a front door and surround fitted by SM Solutions today. What an amazing job they did. The door looks fab and so much better than I thought it would. The 2 lads that installed the door were very friendly and extremely neat and tidy. They left the house clean when they were finished. Job well done. If you're thinking of a new front door then I'd highly recommend this company.

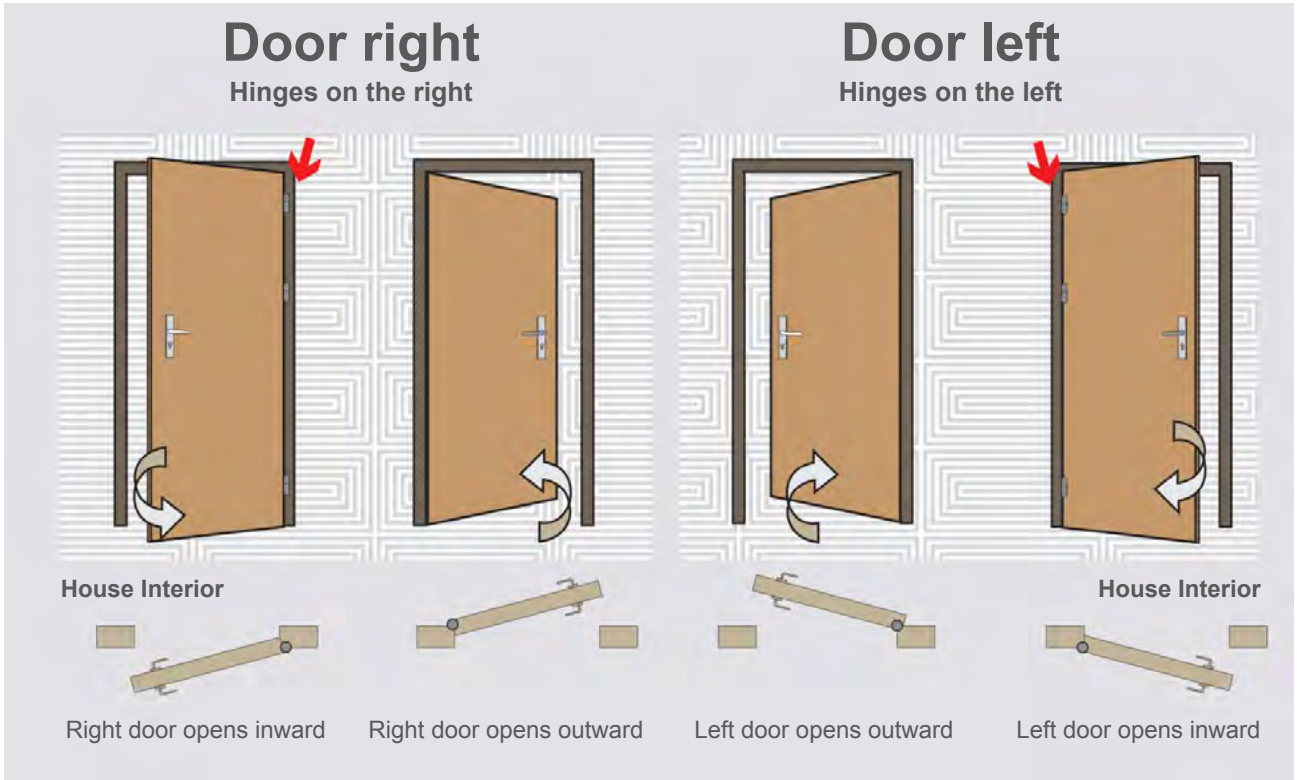

Vicky

Great service at SM Solutions. Very professional and high quality door just installed! Highly recommended

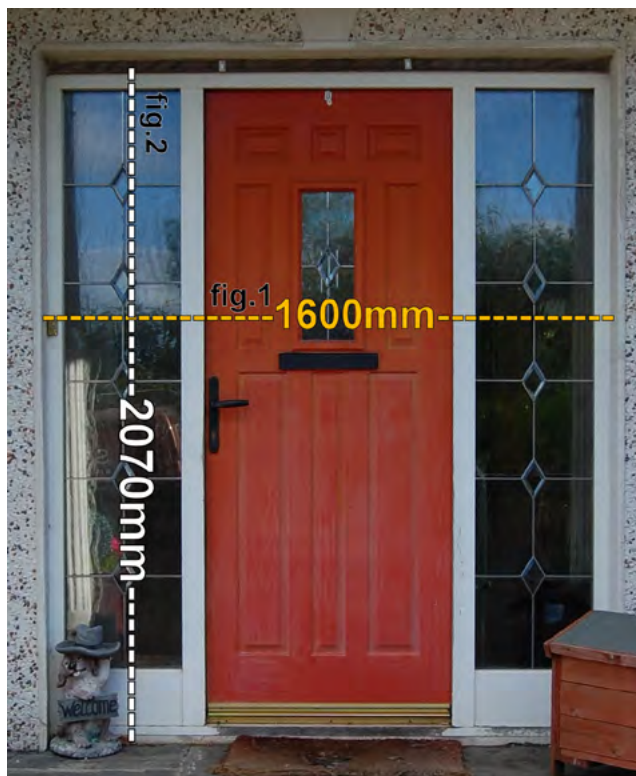

Franco

Door opening directions

MEASURING GUIDE

First measure the width of the opening from wall to wall (fig.1). Next measure height of the opening from threshold to wall (fig.2)
