- we offer our services across the entire country, including Northern Ireland
- we handle both the private and commercial sectors
- we are fully insured
- we provide fully qualified fitters
- we offer high-quality service and verified products

TESTIMONIALS

My husband and I employed SM Solutions in order to install outdoor security shutters at our home in Wexford. From the outset, we were impressed by the knowledge, advice and efficiency of Mac who came to assess the property's vulnerabilities as regards the security of our home. We were very happy with the quote we were supplied with and this quote did not vary at any time. There were no surprise add-ons to the price. There was a very large amount of work involved - the property being large. We had been given a start and a completion date and these dates were adhered to, Mac and his team working extremely hard to meet these. The standard of work is exceptionally good. The shutters were chosen to match the colour of our outside walls - they blend in perfectly. We are extremely pleased with the ease of their operation and we are planning to add to the number of shutters installed in the very near future.

Thank you SM Solutions! Joan and John

"We would like to highly recommend SM Solutions. We first spoke to Mac when we arrived at the shop and found him to be very professional and polite. Mac was probably not expecting to be as long as he was when taking measurements at the house as we wanted to add extras and discuss different options. He was very helpful and understanding at this stage, he didn't rush us into making a decision and took the time to explain everything in a sufficient way. With regards to the fitters from start to finish they were very professional, friendly and clean while installing both the door and windows. The door and windows are of excellent quality and you couldn't ask for more experienced installers who pay great attention to detail with their work. Cannot express enough how happy we are with the door and windows they have completely transformed the house, the whole team really are top class professionals. Highly recommend this company to anyone looking for new windows or doors on their house. Once again a big thank you to you all".

A window without a roller shutter

A window with a closed roller shutter

COMMERCIAL ROLLER SHUTTERS

Business people are constantly looking for ways to improve their premises' security, especially now that burglary and vandalism are on the increase. Our Aluminium Security Roller Shutters protect both windows and doors. These Shop Security Shutters give business owners peace of mind whether their premises are occupied or vacant.

Our company is offering innovative technology which can increase security, reduce noise and increase thermal insulation. The appearance of your property is enhanced with our Insulated Roller Shutters, and they might even increase the property value. We offer a Security Roller Shutters system from one of the leading manufacturer in Europe.

Security Shutters are manufactured from high quality aluminum profiles: PA 52, PA 55, PA 77 filled with a thermal insulation.

Can be operated manually or electronically from inside and outside the building:

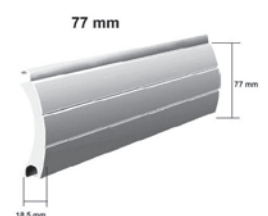

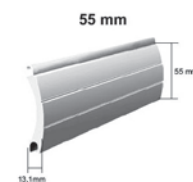

GARAGE DOORS

Insulated Roller Doors

Made of 55 mm and 77 mm aluminium profiles, and filled with polyurethane foam, with its thickness ranging between 13.1 mm to 18.5 mm. This ensures thermal and acoustic insulation. The profiles are made from high quality aluminium plates available in wide range of colours. We offer roller doors up to 4.5 m wide. Profiles are waterproof and easy to maintain. If needed, the 77 mm profiles can be combined with glazed profiles and air vents. Automated and remote controlled in standard. It allows the roller door to be opened and closed without leaving the car.

Sectional Garage Doors

Sectional garage doors are functional, solid, safe and match the look of the elevation. The way the doors operate ensure maximum amount of space for the car parked inside of the garage and on the drive way. The many different finishes allow for the creation of innovative and unique solutions. Sectional garage doors can be fitted to different types of garages with different entrance widths, as well as a double garages. The high product standard guarantees comfort, safety, ease of use and ideal acoustic insulation.

RETRACTABLE GRILLES

Retractable and Fixed Security Grilles are the most effective way to protect your apartment, house, shop or office. Produced in many variations they fulfil the function of protection in even the most dangerous of places. Security grilles can be fitted inside the room, this means we view the outside through permanently closed grilles. It gives a sense of security when you are in the room, and after leaving it.
